The Calgary International Summer Program offers exciting learning opportunities on and off campus, ensuring an enriching international learning experience.

The Calgary International Summer Program is a 4-week program for international students interested in visiting Canada during the summer season.

Students will be immersed in the UCalgary campus environment while taking one academic course taught by University of Calgary faculty and an English training course from English language specialists from UCalgary Continuing Education. In this intensive program, students will improve their English language skills, gain international academic experience, learn Canadian culture first-hand and visit top destinations in and around Calgary.

Registration and Course Credit
The University of Calgary does not grant credit for these programs.

Group students: Please contact the international office at your home university to apply and register for this program and to confirm that you will receive credit for these academic courses in your home university degree program

Individual students: Please register at conted.ucalgary.ca/calgarysummer

2021 CALGARY INTERNATIONAL SUMMER PROGRAM
Academic Course and English Training

ADMISSION REQUIREMENTS
• 18 years of age or older
• Must be confident learning in an English classroom at the undergraduate level
• Must meet the Continuing Education English Proficiency Requirements (conted.ucalgary.ca/info/english.jsp)

COURSES

ENGLISH TRAINING
ESL 101: English Communication
A communicative approach to learning English, including lectures, learning activities, thematic exercises, listening activities, pair/group work, and class discussions. Students will learn how to communicate on a variety of topics using appropriate grammar and vocabulary, and employ language strategies to improve oral fluency, comprehensibility, and listening comprehension.

Option 1 - ENGINEERING STREAM
IENG 355: Introduction to Energy and the Environment
History of energy technologies; energetics of natural systems and agriculture; formation, extraction and transformations of fossil fuels, renewables such as biomass, solar and wind; and the electricity system, environmental impacts of energy systems, and technical options for transforming energy systems to reduce environmental impacts.

Option 2 - ENGINEERING STREAM
IENG 527: Project Engineering

Option 3 - NURSING STREAM
INUR 285: Canadian Nursing Context and Practice
This course explains the concepts foundational to the profession and discipline of nursing in Canada. The course emphasizes the social commitments and contributions of nursing within nurses’ professional scope of practice. The course explores complexity and transition, social justice, and ethics of care. The course includes a comprehensive overview of the Canadian health care system.

Option 4 - NURSING STREAM
INUR 287: Community and Population Health
In this course, determinants of health, health indices, principles and methods of epidemiology, and population-based health management are emphasized. Conduct of health surveys and use of population-based health data to identify health risk are addressed. Concepts of microbiology and risk elevation related to ages and stages of the lifespan are integrated. Basic tenets of evidence-informed practice will be introduced.
