2020 CALGARY INTERNATIONAL SUMMER PROGRAM

Academic Study

The Calgary International Summer Program offers exciting learning opportunities on and off campus, ensuring an enriching international learning experience.

The Calgary International Summer Program is a 4-week program for international students interested in visiting Canada during summer session.

Students will be immersed in the UCalgary campus environment while taking two academic courses taught by University of Calgary faculty. There are two streams available for students to choose from: Engineering stream in collaboration with the Schulich School of Engineering; and Nursing stream taught by the faculty of nursing. In this intensive program, students will gain international academic experience, learn Canadian culture first-hand and visit top destinations in and around Calgary.

Courses will be graded and include a certificate of participation.

COURSE PACKAGES
DATES AND PRICE:

COURSES

Option 1 - ENGINEERING STREAM
IENG 355: Introduction to Energy and the Environment
History of energy technologies; energetics of natural systems and agriculture; formation, extraction and transformations of fossil fuels, renewables such as biomass, solar and wind; and the electricity system, environmental impacts of energy systems, and technical options for transforming energy systems to reduce environmental impacts.

IENG 527: Project Engineering

Option 2 - NURSING STREAM
INUR 285: Canadian Nursing Context and Practice
This course explains the concepts foundational to the profession and discipline of nursing in Canada. The course emphasizes the social commitments and contributions of nursing within nurses’ professional scope of practice. The course explores complexity and transition, social justice, and ethics of care. The course includes a comprehensive overview of the Canadian health care system.

INUR 287: Community and Population Health
In this course, determinants of health, health indices, principles and methods of epidemiology, and population-based health management are emphasized. Conduct of health surveys and use of population-based health data to identify health risk are addressed. Concepts of microbiology and risk evaluation related to ages and stages of the lifespan are integrated. Basic tenets of evidence-informed practice will be introduced.

ADMISSION REQUIREMENTS
• 18 years of age or older
• Must be confident learning in an English classroom at the undergraduate level
• Must meet the Continuing Education English Proficiency Requirements (conted.ucalgary.ca/info/english.jsp)
• Must be currently enrolled as a student at a UCalgary partner university
